

P999-G12PLUS

Radiator protection, coolant additive concentrate Colour: pink/violet

Description:

P999-G12PLUS is a concentrate based on 1.2-ethanediol (mono-ethylene glycol), radiator protection and heat exchanger agent for operation both, summer and winter with permanent frost and rust protection (for all-season use).

P999-G12PLUS has been developed with high quality corrosion additives for motor and cooling system, and meets the current standard in the development of engine-building.

P999-G12PLUS is free of nitrites, amines, phosphates and silicate.

Characteristics:

- Longer and outstanding corrosion protection
- Improved heat transfer
- Decreased right to compensation regarding repairs at the cooling system
- Suitable for mixed fleets, one product for cars, trucks and construction machinery
- Ecologically desirable because of longer working life
- Avoidance of foaming
- Compatibility with hose and sealing materials
- Compatibility with varnishes

Usage:

P999-G12PLUS is excellently suitable for motors being made of cast iron, aluminium or of a combination of both the metals and at cooling systems being made of aluminium or copper alloyage.

P999-G12PLUS is especially recommended for light run motors where a special aluminium protection at higher temperatures is required.

Recommended working concentration 50 % **P999-G12PLUS** and 50% water, radiator protection up to -37 °C can be achieved. Antifreeze protection down to -68°C is possible with a maximum of 69% **P999-G12PLUS** and 31% water.

Use-duration:

Commercial vehicles to 500.000 km (ca. 8.000 hours)

Passenger cars to 250.000 km (ca. 2.000 hours)

Stationary engines to 32.000 hours (or 5 years)

It is recommended, the coolant of radiators, to change all 5 years at the earliest, or if necessary with the achievement of the named stand-times.

Usable for:

Miscibility:

- P999-G12PLUS** can be mixed with the most of the coolants based on ethylene glycol.
 To achieve an optimal corrosion protection and to avoid sludge formation it is recommended to use pure **P999-G12PLUS**.
 For the preparation of mixtures softened water should be preferred.

Typical characteristics:

Specific weight at 20°C	kg/m ³	1.100 - 1.140
Boiling point	°C	> 175
pH-value	(50 Vol.%)	8,5
Water content	%	3,7
Pour point antifreeze/water=1:1 °C		-37
Reserve alkalinity		> 5,0
Colour		pink (violet)
