

CATALOGUE PRESENTATION

This catalogue is organised by **Vehicle Type in two sections** :

HDV (Heavy Duty Vehicles)

This catalogue also covers most popular calipers on the market today.

Cross-reference information begins on page 6.
All possible part numbers are cross-referred to TT n° in alpha numerical order. (Knorr, Volvo, Meritor, Scania, Daimler, Wabco etc...)

Typical **exploded views** of most key models are shown in the kit section, to help you choose correct the repair kits.

WARRANTY TERMS

All calipers are covered by a One Year Warranty, valid worldwide.

Should TT rebuilt caliper, sold by any of the above companies, break down in any of these territories, calipers will be replaced "No questions Asked", pending our Warranty Report. Replacement calipers are invoiced, and credited should the warranty be accepted.

Introduction

Ever since the introduction of disc brakes on Heavy Trucks and Buses, Trucktechnic has been investing in rebuilding capacity.

Today, a specialised 600 m² workshop is fully operational, with a high rebuilding capacity and independent engineering support.

→ *Degreasing machines*

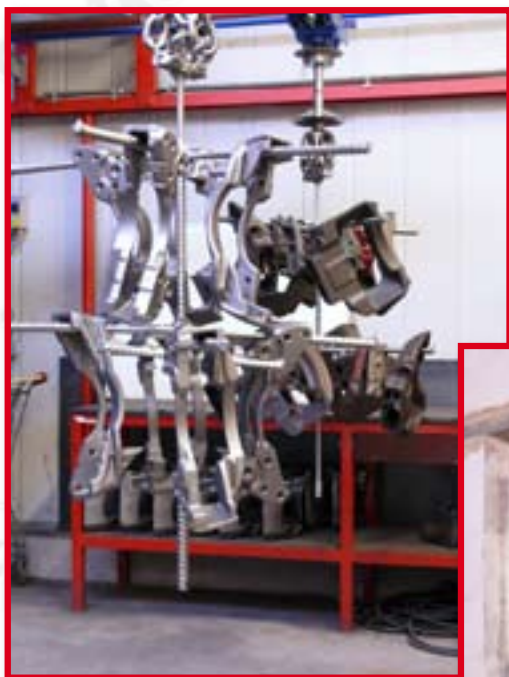

→ *Blasting machines*

Degreasing and blasting machines, conceived especially for the job, can handle more than 200 units daily.

Temperature resistant paint (<math><400\text{ C}^\circ</math>) is applied to all caliper bodies after blasting.

By investing extensively in our own spare parts and repair kits, as well as consuming high quantities of essential ORIGINAL spare parts from market leaders Knorr-Bremse, Arvin Meritor and Wabco, we achieve **high production efficiency**. Consequently, apart from main body components, very **few old parts are re-used**, and then only after careful **quality control**.

Assembly is carried out using **the specialised tools** recommended by the manufacturer, with scrupulous regard to the original specification.

Caliper testing and adjustment is carried out strictly according to manufacturer's instructions, using their own specified electronic equipment.

QUALITY IMPROVEMENTS

One of the biggest problems preventing Disc Brakes from operating properly is **RUST**

Water, salt, heat and dirt make the **GUIDE PINS** on which the caliper slides **RUST NOT OURS !**

TRUCKTECHNIC HAS DEVELOPED GUIDES IN SPECIAL ALLOY WHICH DOES NOT RUST

COMPARATIVE QUALITY TEST

We carried out some salt spray tests on **ORIGINAL PINS** from various makers and our own

Other maker guide pin after 2 hours

(+/- 3 months on a truck)

Other maker guide pin after 6 hours

(+/- 9 months on a truck)

Other maker guide pin after 12 hours

(+/- 18 months on a truck)

TRUCKTEHNIC guide pin after 12 hours

CONDITIONS OF SALT SPRAY TEST

- 1 1.5 % NaCl of the spraying air (NaCl 40 g/l)
- 2 PH value : 6.5
- 3 Pressure in 1 Atm
- 4 Spraying volume (ml/80cm²/h) 1.0 ~2.0
- 5 Temp : 35°
- 6 Humidity: 85 %

CALIPER TOOL CASES

TT KIT n°	CKSK.21
Maker	KNORR
OR kit n°	ZB9032
