www.donbrakes.com

Don is a registered trademark of TMD Friction
designed and produced by purebrand www.purebrandcreative.com

UK-FR 08.08

www.donbrakes.com

An increasing number of brake pads in the Don range now come pre-treated with a 'special surface coating'. This coating helps to cleanse the brake disc during the bedding-in process, whilst providing excellent 'first stop' (high μ) performance.

Don brake pads for Knorr-Bremse applications come complete with OE specification fitting kit accessories (Brake caliper pad retention bars, springs clips, seals/plugs). Many other Don brake pad items are complimented and supported by an extensive range of wear indicator and fitting kit accessories. A complete list of these is provided within this catalogue.
